

**I CLAIM:**

1. A picture holder comprising:
  - a supporting device including two downwardly and outwardly extended flaps, and an upper panel coupled between upper portions of said flaps, to form an inverted U-shaped supporting structure, and
  - a loose-leaf binder device engaged onto and secured to said upper panel of said supporting device, and including at least two binder rings provided thereon, for detachably attaching photos thereon.
- 10 2. The picture holder as claimed in claim 1, wherein said loose-leaf binder device is secured to said upper panel of said supporting device with fasteners.
